ABOUT THE COMPANY

IC Solution (ICS) is a digital service provider that aims to provide software, designing and marketing solutions to individuals and businesses. At ICS, we believe that service and quality is the key to success

We provide all kinds of technological and designing solutions from Billing Software to Web Designs or any custom demand that you may have. Experience the service like none other!

Some of our services include:

Development - We develop responsive, functional and super-fast websites. We keep User Experience in mind while creating websites. A website should load quickly and should be accessible even on a small view-port and slow internet connection.

Mobile Application - We offer a wide range of professional Android, iOS & Hybrid app development services for our global clients, from a start up to a large enterprise.

Design - We offer professional Graphic design, Brochure design & Logo design. We are experts in crafting visual content to convey the right message to the customers.

Consultancy - We are here to provide you with expert advice on your design and development requirement.

Videos - We create a polished professional video that impresses your audience.

OVERVIEW OF THE PROJECT

Project Name: LEAF NOW

Team Members: MD IMRANUDDIN (3GN18CS055)

SRAJAN R POOJARI (2HN18CS034)

REHAN G (1CR18EE074)

TEJASWINI C (1EP18IS087)

This project is based on Web Development And its Applications. The main objective of this project is to learn the implementation of HTML, CSS and JavaScript. The basic webpage of this project is created using HTML and styling of the webpage is done using CSS.

Ever since industrialization started the care for plants has made it to our least priority list, Even though mankind requires plants to balance the food chain that he's a part of, but the plant enthusiasts are everywhere, be it big metropolitan cities or rural areas, so we aim to bring in a platform that can connect these plant/nature enthusiasts and help them exchange/sell them plants or donate seeds/plants as part of the green initiative.

We often don't think to buy plant online. But what if we tell you that you can now order the most beautiful plants right from home? This app presents a broad range of Live Plants that can be bought online in India. Our online nursery collection includes Annual Flowers, Aromatic and Aquatic Plants, Cactii, Bonsai, Ferns, Indoor and Outdoor Plants, Landscape Plants, Bamboo, etc..

ABOUT LEAF NOW

The most important feature of LEAF NOW is connecting enthusiasts, which means that users should be able to create an account on the site and can start filling a form to submit their services, which will later be published by our team if it is genuine. The second feature is encouraging users to sell/buy/donate plants/seeds, by letting them know the importance of the same.

While buying indoor plants online in India might be new, this app is the top choice to buy live indoor plants online in India amongst home gardeners to get healthy premium quality plants delivered safely to their doorstep.

We have a curated list of healthy indoor plants for home and office, ranging from succulents, flowering plants, herbs and vegetables, bonsai, to landscape plants to name a few.

All our online plants have detailed information like plant care tips, growing conditions, plant FAQs, and all our indoor plants resemble the plant images shown online on our website.

We guarantee safe and quick delivery of the best quality indoor live plants.

We sell low-light indoor plants, plants for bedrooms, air-purifying plants, and pet-friendly plants of premium quality.

This app is also a one-stop shop for all gardening tools, pesticides, fertilizers, and other plant shopping.

“we firmly believe that we do not inherit the earth from our ancestors, but borrow it from our children.”

Let's pass it on cleaner, better, and greener.

TOOLS USED

Software Requirements

- Visual Studio Code 2019.
- Google Chrome or Microsoft Edge of latest version.
- Front End: HTML, CSS, JS (optional)
- Linux 7.1 or Windows XP/7/8/10 OS or Mac OS
- MySql database
- PHP server : xampp

Hardware Requirements

- Pentium 200-MHz computer with a minimum of 64 MB of RAM (128 MB of RAM recommended).
- Monitor with a refresh rate of at least 40Hz for a smooth GUI experience (optional).

IMPLEMENTATION

Source Code:

LOGIN PAGE:

```
<?php include 'config.php';

error_reporting(0);

ABOUT MY TEAM

The given project to our team was “LEAF NOW”. We were asked to design and complete the project by 30th September 2021. There were four members in my team. The first team leader divided the jobs equally for all the teammates. One of the team member was assigned to collect information like content, images, videos and the templates. We all took the responsibility of HTML and CSS coding part and also were assigned to make the report. In this way we were easily able complete our project on given time. It’s was a good experience Working with this project.
